What you think, feel, say and do sends
vibrational energy to everything around you.

We are built to intuitively sense these
vibrations.

We do this is through our emotions and our
thoughts .

The Law of Attraction

Like attracts like.

Positive energy attracts more positive energy and vice versa.

We must align our energy with that which we want to attract.

Energy is constantly moving.

Positive energy is more powerful than
negative energy.

Because you can change your energy, you
have the power to change your life.

The Law of Action

You must take inspired action towards your goal every day.

Hard work, should be challenging, but it should also come easily.

There should be no struggle....

Struggle is a sign that you are not aligned with your goals properly.

The Law of Relativity

Nothing can be judged as good, bad, big, small, bad, good etc until it has been experienced and compared to something else.

Things could be worse.

Keep things in perspective

The Law of Correspondence

Everything that happens to you is a reflection of what you believe about yourself.

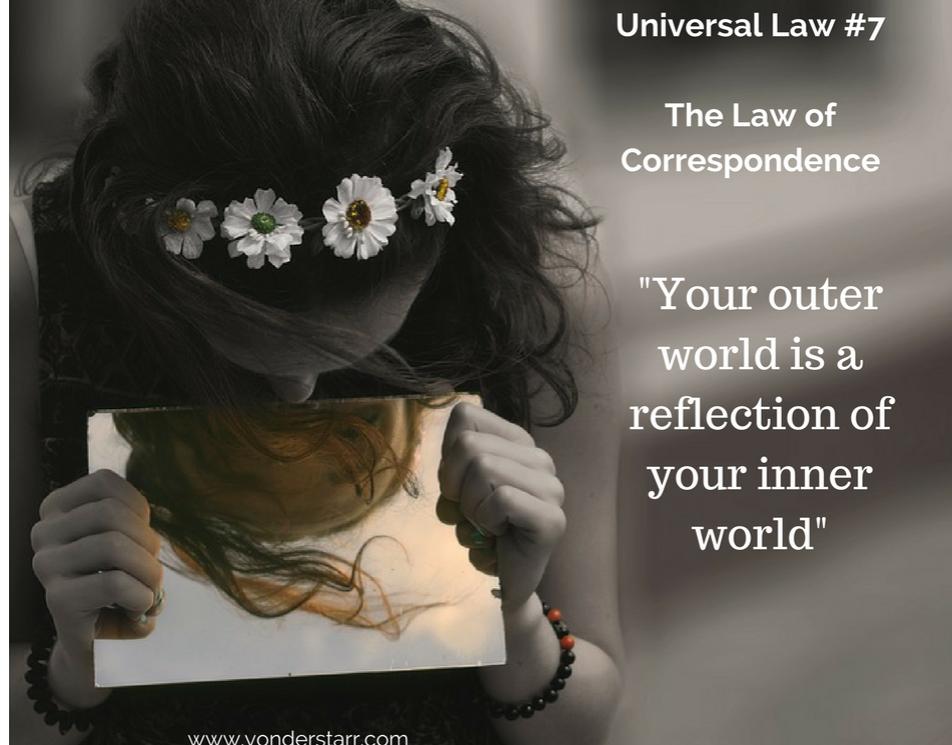

We cannot outperform our own level of self-esteem.

We cannot draw to ourselves more than we think we are worth.

Universal Law #7

The Law of Correspondence

"Your outer world is a reflection of your inner world"

Universal Law # 8
The Law of Polarity

All things have an opposite
Without one, the other would not exist

www.yonderstarr.com

The Law of Polarity

All things have an opposite

Energy flows where attention goes.

Give focus to that which you want to attract rather than what you don't want.

If you focus on the lack of something, you attract more lack, you must instead focus on its opposite.

The Law of Rhythm

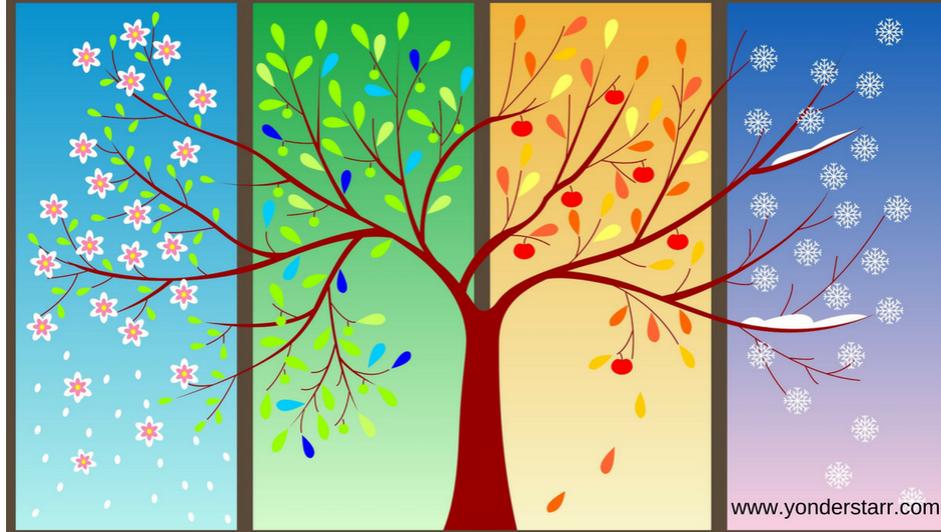

All energy flows and has its own rhythm and frequency.

It ebbs and flows.

These rhythms establish their own cycles and patterns.

Each pattern has its own purpose and function & is a vital part of a larger cycle.

Universal Law #9 The Law of Rhythm

"Everything flows - all energy vibrates according to its own rhythm"

Universal Law #10 The Law of Gender

"All things have both masculine and feminine energies and must be in balance"

The Law of Gender

All things have Masculine and Feminine Energy, the Yin/Yan and must be in balance.

When we plant a seed, it requires time to grow and manifest.

Both masculine and feminine energies are required for life to exist.

The Law of Cause and Effect

As you sow, so shall ye reap.

If you are passionate and put forth your energy in positive ways, you are rewarded.

If you are negative toward yourself and others, that energy will return to you as consequences.

Universal Law #11

The Law of Cause and Effect

aka "Karma"

"All things created are a result of a previous action"

You get back what you give to others.

Be generous with your time, love... give of yourself and it will be returned to you.

Be generous with your abundance and share in your current capacity to do so.
